Hazard

Hazard Description	Players under the age of 8 unable to perform activity
How are Persons Affected?	Players under the age of 8 do not have the physical strength to perform this activity.
Level of Risk (Probability)	2
Level of Risk (Severity)	1
Level of Risk (Risk)	0-8
Existing Controls	Players under the age of 18 years will need to have consent from a parent or guardian to participate. Players between the ages of 8 & 12 years will also need to be accompanied by an adult even if not participating. The person at the point of sale is responsible for stating the age requirements and parent responsibilities whilst in the play area

Further Controls / Action

KEY

Probability (P) 5=very likely, 4=likely, 3=quite possible, 2=possible, 1=unlikely

Severity (S) 5=fatal, 4=severe, 3=moderate, 2=slight, 1=negligible

Risk (R) 0-8=low risk, no action required. 9-15=medium risk, ensure adequate controls are in use. 16-25=high risk, stop operation & implement control measures

Hazard

Hazard Description	Axes landing into somebody's lane
How are Persons Affected?	Being hit with an axe
Level of Risk (Probability)	2
Level of Risk (Severity)	2
Level of Risk (Risk)	9-15
Existing Controls	BearPack uses a double backing net to catch any stray axes, the targets are positioned so no axes will ever bounce off the target, lanes and targets are secure with guide ropes and pegs.

Further Controls / Action

KEY

Probability (P) 5=very likely, 4=likely, 3=quite possible, 2=possible, 1=unlikely

Severity (S) 5=fatal, 4=severe, 3=moderate, 2=slight, 1=negligible

Risk (R) 0-8=low risk, no action required. 9-15=medium risk, ensure adequate controls are in use. 16-25=high risk, stop operation & implement control measures
